

10 TABER ST

BOSTON, MASSACHUSETTS

10 Taber Street brings contemporary mixed-use living to Boston's Nubian Square, combining modern residential spaces with ground-floor retail in a thoughtfully designed six-story development. Located across from Nubian Station and designed by Hresko Associates, Inc., the project contributes to the neighborhood's continued growth and revitalization.

King Klinker America's **Manganese** thin brick in Modular Size plays a key role in shaping the building's distinctive exterior. The rich tones and textured façade reflect the architectural character of the surrounding community while delivering the durability and timeless appeal of masonry construction. **A standout detail of the project is the use of thin brick to create a full brick appearance on the soldier course, adding depth and craftsmanship to the design.**

By blending residential and commercial spaces with carefully selected architectural materials, 10 Taber Street enhances the evolving urban fabric of Nubian Square while creating a strong sense of place within the community.

THIN BRICK BREAKDOWN

Manganese | Modular Size

PROJECT TEAM

Architect: Hresko Associates, Inc.

Distributor: Reuther Material Company

Thin Brick Manufacturer: King Klinker

UNIQUE FEATURE

The use of thin brick to achieve a full brick appearance on the soldier course.
