

FAMILY PRACTICE

WEST JORDAN, UTAH

Set against the stunning backdrop of Utah's mountain landscape, this modern healthcare development in West Jordan showcases King Klinker America's **Black Beauty** thin brick in an American Imperial size, bringing timeless character and durability to the building's contemporary design. The deep, sophisticated tones of Black Beauty create a striking contrast against the natural surroundings while complementing the clean architectural lines of the medical office.

Home to RPT Physical Therapy, Vitae Chiropractic, and Families First Pediatrics, the facility was designed to create a welcoming environment through expansive windows, efficient layouts, and shared amenities that support both patients and providers.

The use of King Klinker thin brick brings lasting durability and refined character to the exterior, ensuring a polished appearance for years to come. Conveniently located with ample parking and easy accessibility, the project blends modern aesthetics, practical performance, and the beauty of its surrounding landscape.
