

## NOWY STRZESZYN

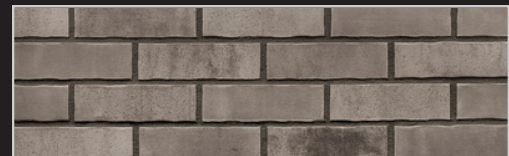

### POZNAŃ, POLAND

The Nowy Strzeszyn residential development in Poznan exemplifies a harmonious blend of modern architecture and natural surroundings. Designed by the architectural firm Insomnia, the project utilizes King Klinker America's thin bricks in a custom 2" x 10" size, specifically the **Roman Theatre**, **Old Amber**, and **Castle Rock** varieties. These selections contribute to the development's distinctive aesthetic, reflecting the rich hues and textures of the local environment.

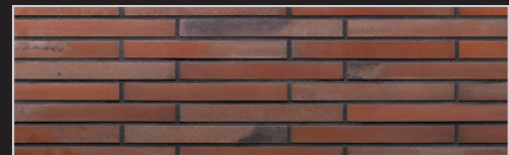

The thoughtful integration of these materials allows the buildings to complement the existing landscape, fostering a seamless connection between the built environment and nature. The project's design emphasizes community and neighborly interaction, with urban planning that encourages social engagement among residents.

In recognition of its outstanding design, Nowy Strzeszyn received the Brick Award 2021 Grand Prix in the 'Feeling at home' category, highlighting its excellence in residential architecture.

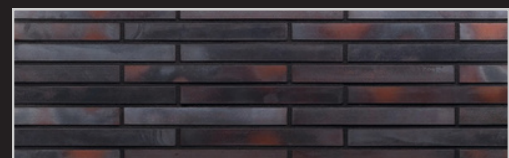

## THIN BRICK BREAKDOWN

Roman Theatre | Custom 2" x 10" (Not shown here)

Old Amber | Custom 2" x 10" (Not shown here)

Castle Rock | Custom 2" x 10" (Not shown here)
