

## 2222 MARKET STREET

### PHILADELPHIA, PENNSYLVANIA

The 2222 Market Street building in Philadelphia is a striking example of contemporary architectural design by the renowned Gensler Philadelphia office. **Awarded the 2023 Project of the Year by the Philadelphia Business Journal**, the development has become a defining addition to the city's evolving skyline, blending modern sophistication with timeless urban character.

A standout feature of the building is its dynamic facade clad in King Klinker's **Obsidian Shadow** thin brick in Norman Size. The rich, dark tones and textured finish create depth, contrast, and visual movement across the exterior, giving the tower a bold yet refined presence. Inspired by Philadelphia's industrial heritage, the facade pairs contemporary glass elements with the enduring craftsmanship of masonry.

Developed for Parkway Corporation and designed as the headquarters for Morgan Lewis, 2222 Market Street demonstrates how innovative materials and thoughtful design can create a lasting impact on the modern urban landscape.
